Bush Brothers & Company first opened up as a tomato cannery in 1908. Almost a century later, Bush Brothers & Company, most well known for Bush’s Baked Beans, completed construction of a new factory in Dandridge, TN.

Hygiene regulations require all floors be washed down regularly. To meet USDA regulations, chemically resistant trench drains were installed to collect and drain away cleaning agents. To meet this requirement Aquaduct 8" trench drains with chemically resistant vinyl ester body and stainless steel frames were used.

In addition to meeting chemical resistance requirements, the trench drains also needed to withstand the day-to-day abuse of traffic. Load Class E stainless steel bar grates were used in the plant areas to withstand forklift traffic. For pedestrian areas Load Class C grates were used.
