

# AQUADUCT

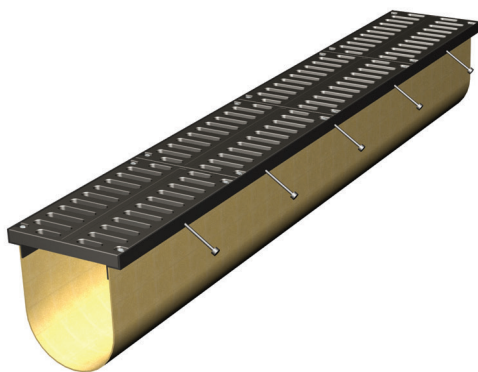

## Juan Santamaria International Airport San Jose, CA

### PROJECT PORTFOLIO

*Product:*  
*Contractor:*

*Aquaduct 12", 336ft. with ACO Ns80 OWS Components*  
*Renteco - San Jose, CA*

When Juan Santamaria International airport needed a drainage system that could handle heavy machinery, 336ft of ACO Aquaduct was installed. It was determined that a 12" would be the correct system for this job, with a large oil/water separator at the end.

The system can be seen in the picture above. It is located behind the wheels of the CopaAirlines airplane.
